Sample Date: 03-Mar-2026
Valid Until: 02-Mar-2028

SOIL HEALTH CARD
(Pradhan Mantri Fasal Bima Yojana - PMFBY)

FARMER & FARM INFORMATION			
Farmer Name	: Subrata Mondal	Card ID	: SHC-WB-2026-007821
State / District	: West Bengal / Burdwan	Taluk / Village	: Memari / Chandipur
Survey No.	: 27/3A	Farm Area	: 0.85 ha
Soil Type	: Heavy Clay (Alluvial)	Sample Date	: 03-Mar-2026
Kharif Crop	: Paddy (Boro)	Rabi Crop	: Mustard
Valid Until	: 02-Mar-2028	Authority	: Dept. of Agriculture, GoI

MACRO NUTRIENT ANALYSIS Primary Nutrients (N, P, K) & Soil pH			
Parameter	Value	Unit	Status
pH	5.40	--	Strongly Acidic
Available Nitrogen (N)	38.0	kg/ha	Low
Available Phosphorus (P)	12.0	kg/ha	Low
Available Potassium (K)	145.0	kg/ha	Medium

SECONDARY NUTRIENTS & MICRONUTRIENT ANALYSIS			
Parameter	Value	Unit	Status
Electrical Conductivity (EC)	0.18	dS/m	Normal
Organic Carbon (OC)	0.42	%	Low
Available Sulphur (S)	8.2	mg/kg	Deficient
Available Zinc (Zn)	0.38	mg/kg	Deficient
Available Iron (Fe)	6.90	mg/kg	Excess
Available Manganese (Mn)	3.50	mg/kg	Excess
Available Copper (Cu)	0.12	mg/kg	Deficient
Available Boron (B)	0.28	mg/kg	Deficient

FERTILISER & SOIL MANAGEMENT RECOMMENDATIONS
* URGENT: Apply 2 tonnes of Agricultural Lime per hectare to raise pH to 6.0-6.5.
* Apply 100 kg N/ha through Ammonium Sulphate (less acidifying than Urea).
* Apply 60 kg P2O5/ha - phosphorus availability severely reduced at pH 5.4.
* Supplement with 20 kg Sulphur/ha via Gypsum to address S deficiency.
* Apply Zinc Sulphate @ 25 kg/ha to correct Zn deficiency before transplanting.
* Avoid flooding for extended periods to manage excess Fe and Mn toxicity.
