Sample Date: 22-Jul-2026
Valid Until: 21-Jul-2028

SOIL HEALTH CARD
(Pradhan Mantri Fasal Bima Yojana - PMFBY)

FARMER & FARM INFORMATION			
Farmer Name	: Jayeshbhai Manibhai Patel	Card ID	: SHC-GJ-2026-031094
State / District	: Gujarat / Vadodara	Taluk / Village	: Karjan / Nandeshwari
Survey No.	: 511/A2	Farm Area	: 3.20 ha
Soil Type	: Deep Black Cotton (Vertisol)	Sample Date	: 22-Jul-2026
Kharif Crop	: Cotton (Bt)	Rabi Crop	: Sugarcane
Valid Until	: 21-Jul-2028	Authority	: Dept. of Agriculture, GoI

MACRO NUTRIENT ANALYSIS Primary Nutrients (N, P, K) & Soil pH			
Parameter	Value	Unit	Status
pH	8.10	--	Moderately Alkaline
Available Nitrogen (N)	67.0	kg/ha	High
Available Phosphorus (P)	31.0	kg/ha	High
Available Potassium (K)	280.0	kg/ha	High

SECONDARY NUTRIENTS & MICRONUTRIENT ANALYSIS			
Parameter	Value	Unit	Status
Electrical Conductivity (EC)	0.75	dS/m	Normal
Organic Carbon (OC)	0.88	%	Medium
Available Sulphur (S)	18.0	mg/kg	Sufficient
Available Zinc (Zn)	0.45	mg/kg	Marginal
Available Iron (Fe)	2.90	mg/kg	Marginal
Available Manganese (Mn)	1.40	mg/kg	Sufficient
Available Copper (Cu)	0.28	mg/kg	Deficient
Available Boron (B)	0.72	mg/kg	Sufficient

FERTILISER & SOIL MANAGEMENT RECOMMENDATIONS
* Apply Gypsum @ 5 tonnes/ha to correct alkalinity and improve soil structure.
* Reduce N fertiliser by 30% - nitrogen levels are high, risk of lodging.
* Apply chelated Zinc (EDTA-Zn) foliar spray @ 0.5% at squaring stage.
* Supplement chelated Iron (Fe-EDTA) @ 0.3% foliar at boll development.
* Add Green Manure (Dhaincha/Sesbania) to improve organic matter and pH.
* Monitor EC - approaching saline threshold; avoid overirrigation.
